SUMMARY

Front-end developer and Computer Engineering student (GPA 3.5 / 4.0) with hands-on professional experience building production React applications. Skilled in modern JavaScript, Firebase, and component-driven UI architecture. Proven ability to deliver under pressure through hackathons and live deployments.

TECHNICAL SKILLS

Frontend: React, React 19, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, Bootstrap, Material UI, Shadcn UI

State & Tooling: Redux, Redux Toolkit, Vite, Git, GitHub

Backend & DB: Firebase (Auth, Firestore, Security Rules), NoSQL

Data & AI: Python, NumPy, Pandas, Scikit-Learn, Power BI, Data Visualization

Concepts: System Design, RBAC, REST APIs, Responsive Design, Performance Optimization

EXPERIENCE

Front-End Developer Intern

Aykays Agency | Remote | Dec 2025 - Present

- Built and maintained 15+ reusable React components, increasing team development speed by 20% across subsequent sprints.
- Migrated legacy JavaScript modules to Vite bundling, reducing initial page load time by 30% and achieving a 95+ Google Lighthouse performance score.
- Translated Figma designs into pixel-accurate, fully responsive interfaces across multiple client projects.

Web Developer (Freelance)

Hex Software | Remote | Dec 2025 - Present

- Developed and shipped client-facing web features using React and Firebase, contributing to production deployments with measurable performance improvements.

PROJECTS

Smart EMS — Enterprise Management System

[Dec 2025](#) | [Live Demo](#) | [GitHub \(demo credentials in README\)](#)

- Architected a full-stack management suite in React and Firebase with a Triple-Tier RBAC system covering Admin, Manager, and Employee roles.
- Wrote Firebase Security Rules enforcing 100% data isolation per User UID and role, eliminating cross-tenant data exposure.
- Designed a flat Firestore schema for 50+ concurrent entries, improving real-time sync speed by 30%.

Webify — Social CRUD Platform

[Nov 2025](#) | [SMIT Mini-Hackathon \(12-Hour Sprint\)](#) | [Live Demo](#)

- Delivered a fully functional social platform with custom authentication and LocalStorage persistence using Vanilla JS within a 12-hour hackathon sprint.

HACKATHONS & ACHIEVEMENTS

SENTEC NED Hackathon — Top Finalist

Oct 2025 | 5-Day Development Sprint

- Co-built a disaster management portal with an AI Engineer, converting live damage metrics into real-time visual dashboards for emergency responders.
- Engineered the Model Training UI and a supply-chain tracking dashboard to ensure logistics transparency during flood relief operations.

EDUCATION & CERTIFICATIONS

B.S. Computer Engineering — Sir Syed University (SSUET)

2025 - 2029 | Karachi, Pakistan | GPA: 3.5 / 4.0

Certified Data Science Specialist — NED University (PITP)

May 2025 - Nov 2025 | Karachi, Pakistan

Modern Web Development Certification — SMIT

May 2025 - Present | Karachi, Pakistan | In Progress
